Current Microbiology

© Springer-Verlag New York Inc. 1990

Acetobacterium woodii, effect of alkyltin compounds on, 329
Acid phosphatases, location in extensively halotolerant bacterium *Halomonas elongata*, 125
Acinetobacter lwoffi, localization and regulation of phosphatases of, 273
S-Adenosylmethionine synthetase, of yeast and hyphal-phase cells of *Candida albicans*, kinetic analysis of, 215
Aflatoxin, biosynthesis in *A. parasiticus*, effect of L-ascorbic acid on, 159
Alginate gel, role in cell wall regeneration by yeast protoplasts, 335
Alkaline phosphatases, location in extensively halotolerant bacterium *Halomonas elongata*, 125
Alkyltin compounds, effect on hydrogen-oxidizing anaerobic bacteria, 329
Allantoin, role in induction of allantoinase in *Rhizobium* species, 115
Allantoinase, induction in *Rhizobium* species, 115
Aminopeptidases, localization in *Streptococcus sanguis* strain 903, 255
Ammonia assimilation, by dissimilar subspecies of *Bradyrhizobium japonicum*, 389
Ammonium, role as repressor in nitrate reductase in *Rhodobacter capsulatus* E1F1, 229
Amphotericin B, susceptibility of *Candida albicans* to, 323
Anaerobic bacteria, hydrogen-oxidizing, effect of alkytin compounds on, 329
Anaerobiosis, regulation of *Escherichia coli* catalases by, 139
Antibiotic susceptibility testing, flow cytometry, 323
Arginine, assimilation in *Streptococcus sanguis* strain, 19
Arginine substrate, role in aminopeptidase activity in cell walls and cytoplasm of *S. sanguis*, 255
Aro genes, of *E. coli*, transposon-generated Tn*10* insertion mutations at, 13
L-Ascorbic acid, effect on biosynthesis of aflatoxin in *Aspergillus parasiticus*, 159
Aspergillus niger, induction and inhibition of 2,3-dihydroxybenzoic acid decarboxylase of, 111
Aspergillus parasiticus, ascorbic acid-mediated lipid peroxidation induction of aflatoxin biosynthesis in, 159
Avidin-biotin complex, incorporation into enzyme-linked immunosorbent assay (ABELISA), 91
Azospirillum brasilense, effect of starvation conditions on longevity and metabolic state of, 385
Azospirillum brasilense Cd, role of avidin-biotin complex in improved detection of, 91

Bacillus brevis spores, gramicidin S-mediated suicide during germination outgrowth of, 165
Bacillus subtilis, stabilization of plasmid-encoded LacZ$^+$ phenotype in, 395
Bacteroides fragilis, coaggregation between *Escherichia coli* and, 185
Bacteroides succinogenes, ruminal strains of, 63
benC, suppressor mutation of β-tubulin mutation in *C. cinereus*, 223
Benzalkonium chloride, role in bonding of ofloxacin to polytetrafluoroethylene suture, 27
β-tubulin mutations, of *Coprinus cinereus*, analyses of revertants of, 223
Bioreactor, external loop, use in isolating flocculating strain of *Kluyveromyces marxianus*, 209
Bradyrhizobium japonicum, isolation of extracellular polysaccharide depolymerase produced by, 375
Bradyrhizobium japonicum subspecies, fixed-nitrogen uptake and symbiotic indoleacetic acid production in, 389

Calcium ion, role in rhythmic nitrogen fixation at transcriptional level, 23
Candida albicans
  antibiotic susceptibility testing of, 323
  biosynthesis of major phospholipids in, 371
  morphology-specific isozymes in, 215
Capsule development, of acidic extracellular polysaccharides secreted by cowpea rhizobia, 145
N^5-(L-1-Carboxyethyl)-L-ornithine, in *Streptococcus lactis*, regulation of biosynthesis and turnover of, 239
N^5-(L-1-Carboxyethyl)-L-ornithine : NADP$^+$ oxidoreductase, in *S. lactis*, distribution, constitutivity, and regulation, 239
Catalase activity, in *E. coli*, repression by glucose, 139
Catechol-type siderophore, isolation and partial characterization of, 283
Cell extracts, from oral treponemes, hydrolysis of pentapeptide by, 69
Cell recycling, effect on product formation by *Lactobacillus casei* ssp. *rhamnosus*, 287
Cell wall regeneration, by yeast protoplasts in alginate, 335
Cellulase induction, in *Neocallimastix frontalis* isolate EB188, effect of media on, 265
China, isolation of *E. coli* strains in, 299
Chloroform, induction of aflatoxin synthesis by, 159
Cholesterol, *Propionibacterium freudenreichii* uptake of, 305
Clofazimine, effect on intracellular growth of *Mycobacterium avium*, 261
Clostridium botulinum, occurrence in soil around Rome, 317
Clostridium butyricum, infant botulism and, 317
Clostridium difficile, cloning and expression of toxin B gene of, 353
Clostridium perfringens spores, effect of pH of sporulation environment on heat resistance of, 233
Clostridium thermocellum, thermophilic degradation of pectin by, 77
Coaggregation, of urogenital bacteria, 47
Continuous culture, with complete cell recycling, 287
Coprinus cinereus, revertants of β-tubulin mutants of, 223
Cowpea *Rhizobium*, capsule development and morphology of acidic extracellular polysaccharides secreted by, 145
Culture pH, effect on resistance of *C. perfringens* spores to heat-related injury or inactivation, 233
Cyclic AMP
  control of expression of heat-labile enterotoxin genes in *E. coli*, 83
  role in catabolite repression, 139
Cycloheximide
  effect on synthesis of heat shock proteins in *T. pullulans*, 359
  effect on thermotolerance of *T. pullulans* after heat shock, 359
Cystic fibrosis, role of *P. cepacia* respiratory tract colonization and exopolymer formation in, 191
Cytochromes, anaerobic induction by dimethyl sulfoxide in *E. coli*, 245
Cytomegalovirus, detection in shell vial cell culture monolayers, 39

Dairy food fermentation, role of *Propionibacterium freudenreichii* in, 305
Dental plaque, role of arginine uptake and dissimilation in *S. sanguis* strain, 19
Desulfovibrio thermophilus, effect of alkyltin compounds on, 329
3(3,4-Dichlorophenol)-1,1-dimethylurea (DCMU), role in rhythmic nitrogen fixation at transcriptional level, 23
2,3-Dihydrobenzoic acid decarboxylase, structural requirements for induction and inhibition of, 111
Dimethyl sulfoxide, anaerobic induction of trimethylamine N-oxide reductase by, 245
DNA, transfer between genetically enegineered microorganism and soil microflora, 105
DNA fragment, of *Bacteroides succinogenes*, hybridization to gene probe, 63
DNA methylation gene, in *E. coli* K-12, expression of, 133

Enterobacter cloacae, effect of starvation conditions on longevity and metabolic state of, 385
Enterotoxin genes, expression in *E. coli* controlled by cyclic AMP, 83
Enterotoxins, lysis of *E. coli* by fusion of extracellular and periplasmic, 31
Enzyme-linked immunosorbent assay, use in detection of Azospirillum brasilense Cd, 91
Escherichia coli
  anaerobic induction of trimethylamine N-oxide reductase and cytochromes in, 245
  coaggregation between *Bacteroides fragilis* and, 185
  expression of heat-labile enterotoxin genes in, 83
  lysis by fusion of extracellular to periplasmic enterotoxins, 31
  minicell-producing strain of, plasmid transcription and translation in, 381
  P. aeruginosa outer membrane protein F produced in, 171
  purification of endoglucanases produced in, 339
  role in microorganism survival in seawater, 293
  thioglycerol-treated, morphological changes in, 57
Escherichia coli α-hemolysin, excretion of by *S. typhimurium* and *K. pneumoniae*, 1
Escherichia coli catalases, regulation by anaerobiosis, 139
Escherichia coli K-12
  expression of DNA methylation gene in, 133
  expression of methanol dehydrogenase structural gene from *M. tricchosporium* OB3b in, 153
  insertion mutations at *aro* genes of, 13
Escherichia coli O157:H7, isolation and characterization of, 299
Exopolysaccharide formation, in *Pseudomonas cepacia*, 191
Expression vectors, gene-promoter cassette inserted into, 105
Extracellular cellulase activities, in *Neocallimastix frontalis* isolate EB188, media carbon induction of, 265
Extracellular polysaccharide (EPS) depolymerase, effect on EPS in *Bradyrhizobium japonicum*, 375
Extragenic suppressor mutations, of β-tubulin mutation of *Coprinus cinereus*, 223

Fatty acid double-bond isomers
  effect of salinity on composition of, 43
  effect of salinity on sn^{-1}/sn^{-2} positional distribution in membrane phospholipids, 43
Fermentation, of sour dough, role of plasmid content of bacteria in, 201
Flocculent strain, of *Kluyveromyces marxianus*, kinetic parameters of, 209
Flow cytometry, antibioitic susceptibility testing of *Candida albicans* by, 323
5-Fluorocytosine, susceptibility of *Candida albicans* to, 323
fnr genes, regulation of expression of anaerobically induced proteins by, 139
Formate, stimulation of methane and hydrogen production in rumen liquor by, 251
Free fatty acids, of *Leptospira interrogans* serovar *copenhageni avirulent* strain Shibaura, biological activities of, 365
Fusobacterium nucleatum, hydrolysis of γ-glutamyl linkages by, 5

γ-Glutamyl linkages, hydrolysis of by *Fusobacterium nucleatum*, 5
γ-Glutamylpeptidases, hydrolysis of γ-glytamyl-2-naphthylamine by, 5
Gastrointestinal tract, translocation of *Lactobacillus murinus* from, 177
Gene expression
  in *Escherichia coli* K-12, 133
  of methanol dehydrogenase structural gene in *E. coli* K12, 153
  of toxin B of *Clostridium difficile*, 353
  role of genetically engineered microorganism in, 105
Gene probe, cellulase-encoding, for study of *B. succinogenes* isolates, 63
Genetic markers, influence on chromosomal gene transfer in *Spiroplasma citri*, 53
Genetically engineered microorganisms, role in gene transfer and expression in soil microflora, 105
Glucose dehydrogenase, exopolysaccharide formation and loss of activity of, 191
Glucose, role in exopolysaccharide formation in glucose dehydrogenase-deficient *P. cepacia* mutants, 191
Glucose, stimulation of methane and hydrogen production in rumen liquor by, 251
L-Glutamate, role as nitrogen source for *Bradyrhizobium japonicum* subspecies, 389
Glutathione, hydrolysis of by *Fusobacterium nucleatum* enzymes, 5
Gramicidin S, effect on germination outgrowth of *Bacillus brevis* spores, 165

Halomonas elongata, alkaline and acid phosphatases from, 125
Halophilic eubacteria, effect of salinity on fatty acid composition of phospholipids in, 43
Heat shock protein induction, in psychrotrophic yeast *Trichosporon pullulans*, 359
Hemorrhagic colitis, role of *E. coli* O157:H7 in, 299
Hexose phosphate metabolism, in *Pseudomonas cepacia*, 191
Hydrogen, production in rumen liquor, 251
Hydrogen-oxidizing anaerobic bacteria, effect of alkyltin compounds on, 329
Hyphal phase, of *Candida albicans*, S-adenosylmethionine synthetase activity of, 215

Infant botulism, in Rome, role of botulinal organisms in soil in, 317
Insertion sequences, IncHI1 plasmid R27 maxi- and mini-derivatives and, 311
Iron, role in siderophore production by *Pseudomonas stutzeri* RC 7, 283

Ketoconazole, susceptiblity of *Candida albicans* to, 323
Klebsiella pneumoniae, influence of lipopolysaccharide on external hemolytic activity of, 1
Kluyveromyces marxianus, isolation of flocculating strain of, 209

Laboratory eyewash stations, amoebae isolated from, 349

D-Lactic acid, *L. casei* ssp. *rhamnosis* formation of, 287
L-Lactic acid, *L. casei* ssp. *rhamnosis* formation of, 287
Lactic acid bacteria, from sour doughs, plasmid contents of, 201
Lactobacilli, in urine, aggregation with other flora, 47
Lactobacillus acidophilus, bacterial translocation of, 177
Lactobacillus casei ssp. *rhamnosus*, effect of cell recycling on product formation by, 287
Lactobacillus murinus, from gastrointestinal tract, translocation of, 177
Lactose permease, phenotypic suppression of caused by lysis, 31
LacZ$^+$ phenotype, stabilization in *Bacillus subtilis*, 395
Leptospira interrogans serovar *copenhageni* avirulent strain Shibaura, biological activity of lipid components and free fatty acids of, 365
Leu-Gly bond, of microbial collagenase substrate, hydrolysis of, 69
Lipid components, of *Leptospira interrogans* serovar *copenhageni* avirulent strain Shibaura, biological activities of, 365
Lipid peroxidation, ascorbic-acid-mediated, induction of aflatoxin biosynthesis by, 159
Lipopolysaccharides
  of *Pseudomonas aeruginosa*, role in protection by outer membrane protein F, 171
  role in hemolysin excretion by *S. typhimurium* and *K. pneumoniae*, 1
Liposomes, effect on susceptibility of intracellular *Mycobacterium avium* toward rifabutin and clofazimine, 261
Lipoteichoic acid, role in adhesion of *S. epidermidis* to human mucosal cells, 343
LT_B, periplasmic enterotoxin, fusion with ST_A enterotoxin, 31

Marine self-purifying factors, effect on microorganism survival, 293
Media-switching protocol, role in study of cellulase induction in ruminal fungi, 265
Membrane phospholipids, effect of salinity on fatty acids in, 43
Mesenteric lymph nodes, bacterial translocation to, 177
Methane, production in rumen liquor, 251
Methanobacterium bryantii, effect of alkyltin compounds on, 329
Methanobacterium sp., thermophilic degradation of pectin by, 77
Methanococcus sp., effect of alkyltin compounds on, 329
Methanogenesis, from pectin by mixed defined bacterial culture, 77
Methanosarcina barkeri, effect of alkyltin compounds on, 329
Methanosarcina sp., thermophilic degradation of pectin by, 77
Methionine, effect on S-adenosylmethionine synthetase activity in *Candida albicans*, 215
4-Methoxy-2,2′-bipyrrole-5-carboxaldehyde (MBC), 95
2-Methyl-3-amylpyrrole (MAP), role in synthesis of prodigiosin, 95
Methylosinus trichosporium OB3b, molecular cloning of methanol dehydrogenase structural gene from, 153
Microcystis aeruginosa plasmid, transcription and expression of, 381
Microorganisms, survival in seawater, 293
Miniplasmids, from IncHI1 plasmids, characterization of, 311
Molecular cloning, of methanol dehydrogenase structural gene from *Methylosinus trichosporium* OB3b, 153
Mycelia, resting, study of mechanism of ascorbic acid-mediated induction of aflatoxin synthesis in, 159
Mycobacterium avium, effects of clofazimine and rifabutin on intracellular growth of, 261

Neocallimastix frontalis isolate EB188, media carbon induction of extracellular cellulase activities in, 265
nif gene expression, in *Synechococcus* sp. RF-1 in continuous light and diurnal light/dark regimen, 23
Nitrate, role as inductor in nitrate reductase in *Rhodobacter capsulatus* E1F1, 229
Nitrate reductase, regulation in *Rhodobacter capsulatus* E1F1, 229
Nitrite, role as inductor in nitrate reductase in *Rhodobacter capsulatus* E1F1, 229
Nitrogen fixation, rhythmic, of *Synechococcus* sp. RF-1 at transcription level, 23

O_2^- generation, of polymorphonuclear leukocytes, effect of free fatty acids and polar lipids, 365
Ofloxacin, bonding to polytetrafluoroethylene suture, 27
Oleic acid, in free fatty acids and polar lipids of avirulent strain *L. copen.*-Shibaura, 365
Orthophosphate, regulation of synthesis of *A. lwoffi* phosphatases by, 273

Parabanic acid, allantoin utilization in *Rhizobium* species and specific toxicity of, 115
Pectin, thermophilic degradation by a mixed bacterial culture, 77
Pentapeptide, study of hydrolysis of treponemes of Leu-Gly bond of, 69
Pharyngeal epithelial cells, adherence of *Staphylococcus epidermidis* to, 343
Phenotypic suppression, of Lac$^-$ by *E. coli* strains with fused ST-LT_B, 31
Phosphatases, of *Acinetobacter lwoffi*, localization and regulation of synthesis of, 273
Phosphatidylcholine, biosynthesis in *Candida albicans*, 371
Phosphatidylethanolamine, biosynthesis in *Candida albicans*, 371
Phospholipids, biosynthesis in *Candida albicans*, 371
Plasmid contents, of lactic acid bacteria in sour doughs, 201
Plasmid mutants, localization in enterotoxin genes, 31
Plasmid pCED3, recombinant, in *Bacillus subtilis*, stabilization of, 395
Plasmid pMA1, of *Microcystis aeruginosa* strain HUB 5-2-4, restriction map of, 381
Plasmid pMQ3, methylase activity and chromosomal DNA present in, 133
Plasmid pPFC4, role in synthesis of endoglucanases in *E. coli*, 339
Plasmid pYS1, role in stabilization of plasmid pCED3, 395
Plasmid transfer, between genetically engineered microorganism and soil microflora, 105
Plasmids
  of incompatibility group HI1, miniplasmids of, 311
  role in cloning and expression of methanol dehydrogenase structural gene from *M. trichosporium*, 153
Polyethylene glycol, influence on chromosomal gene transfer in *Spiroplasma citri*, 53
Polysaccharides, acidic extracellular, secreted by cowpea rhizobia, 145
Polytetrafluoroethylene suture, bonding of ofloxacin to, 27
Preinoculation centrifugation treatment, effect on detection of cytomegalovirus in urine specimens, 39
Prodigiosin biosynthesis, isolation and characterization of *S. marcescens* mutants defective in, 95
Propionibacterium freudenreichii, cholesterol uptake by, 305
Pseudomonas aeruginosa LEC1, suppression of *Septoria tritici* blotch of wheat by, 121
Pseudomonas aeruginosa outer membrane protein F, retention of vaccine efficacy of, 171
Pseudomonas cepacia, hexose phosphate metabolism and exopolysaccharide formation in, 191

Pseudomonas fluorescens subsp. *cellulosa* endoglucanases, purification of, 339
Pseudomonas putida, effect of starvation conditions on longevity and metabolic state of, 385
Pseudomonas stutzeri RC 7, catechol-type siderophore from, 283
Pyocyanine, role in suppression of *Septoria tritici* blotch on wheat, 121
Pyoverdine, role in suppression of *Septoria tritici* blotch on wheat, 121

Revertants, from β-tubulin mutants of *Coprinus cinereus* of, genetic and biochemical analyses of, 223
Rhizobium species, allantoinase induction in, 115
Rhodobacter capsulatus E1F1, regulation of nitrtate reductase in, 229
Rifabutin, effect on intracellular growth of *Mycobacterium vacium*, 261
Rome, occurrence of *Clostridium botulinum* in soil of, 317
Rumen liquor, formate and glucose stimulation of methane and hydrogen production in, 251
Ruminal fungi, study of cellulase induction in, 265

Saccharomyces cerevisiae, a cell wall regeneration and reversion to cells by, 335
Salicylate, role in induction of 2,3-dihydrobenzoic acid decarboxylase in *A. niger*, 111
Salmonella enteritidis, bacterial translocation of, 177
Salmonella typhimurium
  derivatives of IncHI1 plasmid R27 from, 311
  influence of lipopolysaccharide on external hemolytic activity of, 1
Seawater, survival of pathogenic microorganisms in, 293
Sepsis, bacterial aggregation in, 185
Septoria tritici, suppression by phenzine- or siderophore-deficient mutants of *Pseudomonas*, 121
Serratia marcescens mutants, prodigiosin biosynthesis defectiveness of, 95
Shell vial culture monolayers, enhanced detection of cytomegalovirus in, 39
Silver/organic solvents, role in bonding of ofloxacin to polytetrafluoroethylene suture, 27
Sodium chloride, effect on alkaline and acid phosphatases from *H. elongata*, 125
Soil bacteria, study of longevity and metabolic state in starvation conditions, 385
Sour doughs, plasmid contents of lactic acid bacteria isolated from, 201
Spiroplasma citri, chromosomal gene transfer in, 53
Sporulation environment, effect of pH on heat resistance of *Clostridium perfringens* spores, 233
ST_A, extracellular enterotoxin, fusion with LT_B enterotoxin, 31
Staphylococcus aureus
  challenge to ofloxacin bonding to polytetrafluoroethylene suture with, 27
  lipoteichoic acid derived from, 343
Staphylococcus epidermidis, adherence to paryngeal epithelial cells, 343
Staphylococcus pyogenes, lipoteichoic acid derived from, 343
Streptococcus lactis, biosynthesis and accumulation of N^5-(L-1-carboxyethyl)-L-ornithine in, 239
Streptococcus sanguis, arginine assimilation in straint of, 19
Streptococcus sanguis strain 903, localization of aminopeptidases in, 255
Subgingival plaque, enzyme activity of treponemes isolated from, 69
Symbiotic indoleacetic acid production, by dissimilar subspecies of *Bradyrhizobium japonicum*, 389
Synechococcus sp. RF-1, rhythmic nitrogen-fixing activity of, 23
Syntrophic pigmentation characteristics, classification of mutants according to, 95

Thermotolerance, acquisition with heat shock in psychrotrophic yeast *Trichosporon pullulans*, 359
Thioglycerol, morphological changes in *E. coli* caused by, 57
Tn*10* insertion mutations, transposon-generated, at *aro* genes of *E. coli* K-12, 13
torA, role of trimethylamine N-oxide and dimethyl sulfoxide in expression of, 245
toxA and *toxB* genes, effect of cyclic AMP on expression of, 83
Toxin B gene, of *Clostridium difficile*, cloning and expression of, 353
Treponema denticola, hydrolysis of pentapeptide by enzyme of, 69
Treponemes, hydrolysis of Leu-Gly bond of microbial collagenases by, 69
Trichosporon pullans, heat shock protein induction and thermotolerance in, 359
Trimethylamine N-oxide reductase, anaerobic induction by dimethyl sulfoxide in *E. coli*, 245

Urinary tract infection
  role of autoaggregated uropathogens in, 47
  study of bacterial coaggregation in, 185
Urine, preinoculation treatment with low-speed centrifugation, 39
Urogenital bacteria, coaggregation of, in vitro and in vivo, 47

Vaccine, insertion mutations at *aro* genes *E. coli* as, 13
Vibrio costicola, effect of salinity on fatty acid composition and distribution in phospholipids of, 43

Wollinella succinogenes, effect of alkyltin compounds on, 329

Yeast phase, of *Candida albicans*, S-adenosylmethionine synthetase activity of, 215
Yeast protoplasts, cell wall regeneration and reversion to cells by, 335
